EXPERIENCE

PSQUARE GROUP | Software Intern | **April 2018 – May 2018**

• Well versed with lifecycle of the Software development process. Assisted with designing and implementing software capabilities across different product suites. Designed a different websites for hotel management applications.

PROJECTS

Major Project : Android Application for College Management

Technologies : JAVA, XML, MYSQL, PHP

• Designed an Android Application for college that helps students and faculty to receive notifications from the college management and syllabus updates are maintained in the database. This application generates a unique id that will be sent to user's mail during Signup which helps in provide secured login.

Minor Project : Online Examination System

Technologies : PHP, MYSQL, HTML, and JS

• Online Examination system consists a web server with database facility. The server of this system is mostly configured with proper security measures. Students can connect themselves through the internet or LAN connectivity to the server and take the exam.

CERTIFICATION

• Completed **Salesforce** certification on Business Administration Specialist.
